

Fire Lighters

Light your barbecue safely and easily

24 blocks

DIRECTIONS FOR USE

Place two or three blocks in the barbecue bowl, charcoal grid if supplied or fire grate. Pile the fuel over the blocks in a pyramid shape, ensuring sufficient air space around the blocks to allow to burn with a flame, then light the blocks. For barbecues: after approximately 30 minutes, the charcoal will be covered with a fine grey ash. Carefully spread the charcoal across the barbecue. You are now ready to cook. For fires: keep the draught regulator half closed until fuel is lit, then use full draught. Never add more fire lighters to your barbecue or fire once lit. Storage: Keep Bar-Be-Quick Fire Lighters in a cool dry place away from direct sunlight, heat and all sources of ignition.
