## Barbecue and Fire Lighting Gel

**WARNING** Flammable. Never use petrol, methylated spirits or any other similar volatile fuels to ignite or re-ignite barbecues or fires. Never apply lighting gel onto hot or burning coals and logs. Never leave a lighted barbecue or fire unattended. Never barbecue indoors. Never move the barbecue when in use or when it is still hot. After use replace cap and store away from barbecue or fire. Keep children and pets away from the barbecue or fire. **Storage:** Store in a dry, cool place out of direct sunlight and away from sources of ignition. Complies with EU Standard EN 1860-3:2003

**DIRECTIONS FOR USE** - Shake bottle well before use. The cap is applied at a certain torque for safety. If you find the cap difficult to remove run the bottle neck under hot water for a minute or so and retry. Pile briquettes, lumpwood or kindling in a pyramid shape and cover generously with Lighting Gel. After approximately 1 minute light with a match or taper. After approx 30 minutes the charcoal will be covered with a fine grey ash. Carefully spread it (ensuring Lighting Gel has burnt away before cooking any food). If using on a fire, add more fuel as necessary.
